WORK EXPERIENCE

Hindustan Aeronautics Limited | Ozar ,Nashik

Graduate Apprenticeship Trainee   Jan 2024 - Jan 2025

- Develop a Suite of applications and tools with HAL's IT Department to optimize operational efficiency, enhance data visualization and improve resource management. The system encompasses various models, each tailored to address specific business and technical needs within the organization.
- Contributed to documentation tasks, maintaining accurate records of technical processes and updates.

PROJECTS

Township Administration System in .NET

- The Main objective of the Project is to develop a dynamic , interactive township map system using .net Technology , aimed at facilitating efficient planning, visualization and management of township layouts.
- The application will provide clickable map zones, dynamic highlights, interactive tooltips, making it an indispensable tool for local authorities.
- Build using ASP.NET ,C#, HTML, CSS, SQL, JavaScript ensuring scalability and performance

P-Factor Part Master

- The Primary Objective of the P-Factor Part Master project is to Streamline and enhance the efficiency of part management, aircraft maintenance, and operational workflows within an organization. By leveraging technology, the system is designed to provide real-time insights and support decision making for smoother operations in the aerospace or manufacturing division.
